LIFE CYCLE MANAGEMENT INTERNATIONAL CONFERENCE HELD IN LUXEMBOURG IN SEPTEMBER 2017

Life Cycle Management (LCM) 2017 is an international conference to be held from 03 to 06 September 2017 at the European Congress Center in Luxembourg Kirchberg.

The LCM series is established as one of the major rounds of international conferences in the field of environmental, economic and social sustainability. The unique feature of LCM is to develop practical solutions for the implementation of lifecycle approaches in strategic and operational decision-making. The aim of this cycle of conferences is to bring together decision-makers from science, industry, NGOs and public bodies worldwide.

This is the 8th edition of this event, which takes place every two years. This year, the Luxembourg Institute of Science and Technology is chairing the conference, in collaboration with the University of Luxembourg and ArcelorMittal.

LCM 2017 is expected to host more than 650 participants from more than 40 countries on the theme "Designing Sustainable Technologies, Products and Policies: From Science to Innovation". The organizing committee promotes the participation of stakeholders from the Greater Region, through an attractive programme for SMEs, industries and public bodies. It will aim at demonstrating the implementation of lifecycle and circular economy approaches along businesses value chain.

A B2match system will be in place, to organize in advance B2B meetings during the conference. The participation of several high level keynote speakers and visionary leaders in the domain is planned.

Entries are open, **with a preferential rate for early bird registration valid until Thursday, June 1st**. Entries will then be opened at the regular rate.

LUXEMBOURG INSTITUTE OF SCIENCE AND TECHNOLOGY (LIST)

The Luxembourg Institute of Science and Technology (LIST) is a mission-driven Research and Technology Organization (RTO) that develops advanced technologies and delivers innovative products and services to industry and society. As a major engine of the diversification and growth of Luxembourg's economy through innovation, LIST supports the deployment of a number of solutions to a wide range of sectors, including energy, IT, telecommunications, environment, agriculture, and advanced manufacturing at national and European level. Thanks to its location in an exceptional collaborative environment, namely the Belval Innovation Campus, LIST accelerates time to market by maximizing synergies with different actors, including the university, the national funding agency and industrial clusters.
